RE: Protection of Geodetic Markers STB Docket No. AB-857X

Dear Sir:

American Rail Marketing ("AmRail") has entered into a salvage agreement with Great Western Railway of Colorado, L.L.C. ("GWRCO") for the purchase and removal of abandoned tracks between Windsor, CO (MP 30.8) and Eaton, CO (MP 42.5).

GWRCO has indicated that there are 2 geodetic markers located on the rail line that are not to be disturbed. AmRail agrees to locate and protect the geodetic markers from damage during salvage operations. It is our understanding that the following markers are located on the rail line.

- Designation: Z208  
PID: LL0278  
State/County: CO / Weld  
USGS Quad: Eaton (1975)
- Designation: P136  
PID: LL0262  
State/County: CO / Weld  
USGS Quad: Windsor (1969)

Please contact me at (800) 878-4270 if you require any additional information at this time.

Very truly yours,

Edward B. Saam  
General Manager
