To Whom it may Concern:

If the BLM is planning to put a railroad across the cities of Utah, then they need to put the railroad on BLM Land. For you to force that railroad onto Private land is an evil the transcends belief. There is plenty of BLM land to put the railway on from LeVan to Salina, Yet evil minds justify their plans to put it on private land because they claim it would cost too much to put on their own land. It apparently does not matter that our private land rights are being violated.

It has been said that Satan will rage in the hearts of men in the last days, and if this railway is put on Private land, it will be proof that the men who make this decision are truly disciples of Satan.
