Message:

This is about my right to farm and the effect the proposed rail extension at Pt MacKenzie will have on my business. Either route, west or east corridor, will run through one of my farms. Established in 1982, we have been a productive and economical force in the Mat Valley. The two most favored routes would absolutely end our business and our right to farm. An original surveyed route has not been considered and in reality would cause the least amount of impact to any one farmer by bordering farms and not cutting across one or two entire farms. These popular east and west routes are not acceptable. If the east route adhered to the adjacent road, there would be no problem but according to the map, it leaves the road and diagonals through my farm. Unacceptable. I have a right to farm. L.B.
