Alan:

For some reason, Russell Holter, WA SHPO, always copies me on his emails. At any rate, I looked up the assignment information in CASE and found out that this case belongs to you. So, here is Russell's message.

Subject AB-6 Sub#465x

<<101508-12-STB_022609.pdf>>

Dear Ms. Rutson,

I am sending a corrected letter concerning the above undertaking. This new letter should properly close out the environmental review for AB-6 Sub#465x. In conducting an audit of the reviews associated with the transference of the Kennydale to Snohomish and Woodinville to Redmond lines from the BNSF to the Port of Seattle (which takes in AB-6 Sub#463x; 464x; and 465x; I noticed that the only outstanding action item pertains to AB-6 Sub#464x (Kennydale to Wilburton). According to my records, the Washington SHPO has not reviewed and commented on a final environmental review for this undertaking. Has a determination of effect for this undertaking been made, and if it was, would you please forward it on to me for our concurrence? If it had been sent to the Washington SHPO earlier, I apologize for not responding. I certainly cannot find amongst any outstanding correspondence here at my office.

Sincerely,

Russell Holter
