Planning, Programs, and
Project Management Division

Ms. Christa Dean
Section of Environmental Analysis
Surface Transportation Board
1925 K Street, NW
Washington, DC 20423

Dear Ms. Dean:

I received your letter dated November 3, 2005, concerning rail line construction proposed by Roquette America, Inc. Rock Island District staff reviewed the information you provided and have the following comments:

a. Your proposal does not involve Rock Island District Corps of Engineers (Corps) administered land; therefore, no further Rock Island District Corps real estate coordination is necessary.

b. Any proposed placement of fill or dredged material into waters of the United States (including wetlands) requires Department of the Army authorization under Section 404 of the Clean Water Act. A Section 404 permit will be required for this project. When detailed information is available, please complete and submit the enclosed application packet to the Rock Island District for processing (enclosure). The application should include determinations of wetlands and other waters of the United States, size estimations of impacts to those areas, and wetland types and relative functions.

Prior to completing the permit review process and in compliance with the Clean Water Act Section 404(b)(1) guidelines, we also require sequential mitigation involving an alternatives analysis, minimization of impacts, and compensatory mitigation for any unavoidable impacts. The alternatives analysis must demonstrate how you will avoid impacts by selecting the least environmentally damaging practicable alternative based on wetland sizes, locations, types, and relative functions. Minimization of impacts should consist of a list of appropriate and practicable steps to minimize unavoidable adverse impacts. Compensatory mitigation must include plans to restore or create wetlands to mitigate unavoidable project wetland impacts. If you have any questions regarding permit requirements under Section 404 of the Clean Water Act, please contact Mr. Neal Johnson of our Regulatory Branch. You may reach Mr. Johnson by writing to our address above, ATTN: Regulatory Branch (Neal Johnson), or by telephoning 309/794-5379.

In addition, this project may require a Section 10 permit based on the navigable waters that occur within the study area. When details of the project become available, please contact Mr. Johnson with information or questions regarding navigable waters occurring within the study area.

c. The Responsible Federal Agency should coordinate with Ms. Maria Pandullo, Iowa Historic Preservation Agency, ATTN: Review and Compliance Program, State Historical Society of Iowa, Capitol Complex, Des Moines, Iowa 50319 to determine impacts to historic properties.

d. The Rock Island Field Office of the U.S. Fish and Wildlife Service should be contacted to determine if any federally listed endangered species are being impacted and, if so, how to avoid or minimize impacts. The Rock Island Field Office address is: 4469 - 48th Avenue Court, Rock Island, Illinois 61201. Mr. Rick Nelson is the Field Supervisor. You can reach him by calling 309/793-5800.

e. The Iowa Emergency Management Division should be contacted to determine if the proposed project may impact areas designated as floodway. Mr. Dennis Harper is the Iowa State Hazard Mitigation Team Leader. His address is: Hoover State Office Bldg., Level A, Des Moines, Iowa 50319. You can reach him by calling 515/281-3231.

No other concerns surfaced during our review. Thank you for the opportunity to comment on your proposal. If you need more information, please call Dr. Sandra Brewer of our Economic and Environmental Analysis Branch, telephone 309/794-5171.

You may find additional information about the Corps' Rock Island District on our web site at <http://www.mvr.usace.army.mil>. To find out about other Districts within the Corps, you may visit web site: <http://www.usace.army.mil/divdistmap.html>.

Sincerely,

 Kenneth A. Barr
Chief, Economic and
Environmental Analysis Branch

Operations Division

Enclosed for your use is a Joint Application Packet entitled, "Protecting Iowa Waters." This packet contains the necessary application forms, drawings sheets, instructions, and information for applying for Department of the Army and State of Iowa permits to perform work in waters within Iowa.

Detailed instructions for completing the application are located on pages 3 thru 6 in the Joint Application Packet. In addition, the application form and drawing sheets are on self-copying paper, so please press down firmly with a hard point pen when completing them, or please type them.

The copies of the application form and drawing sheets are identified at the bottom of each page as to which agency should receive which copy. The copy of the completed application form and drawing sheets marked "Corps of Engineers" and any other pertinent information should be mailed to:

U.S. Army Corps of Engineers, Rock Island
ATTN: Regulatory Branch
Clock Tower Building
Post Office Box 2004
Rock Island, Illinois 61204-2004

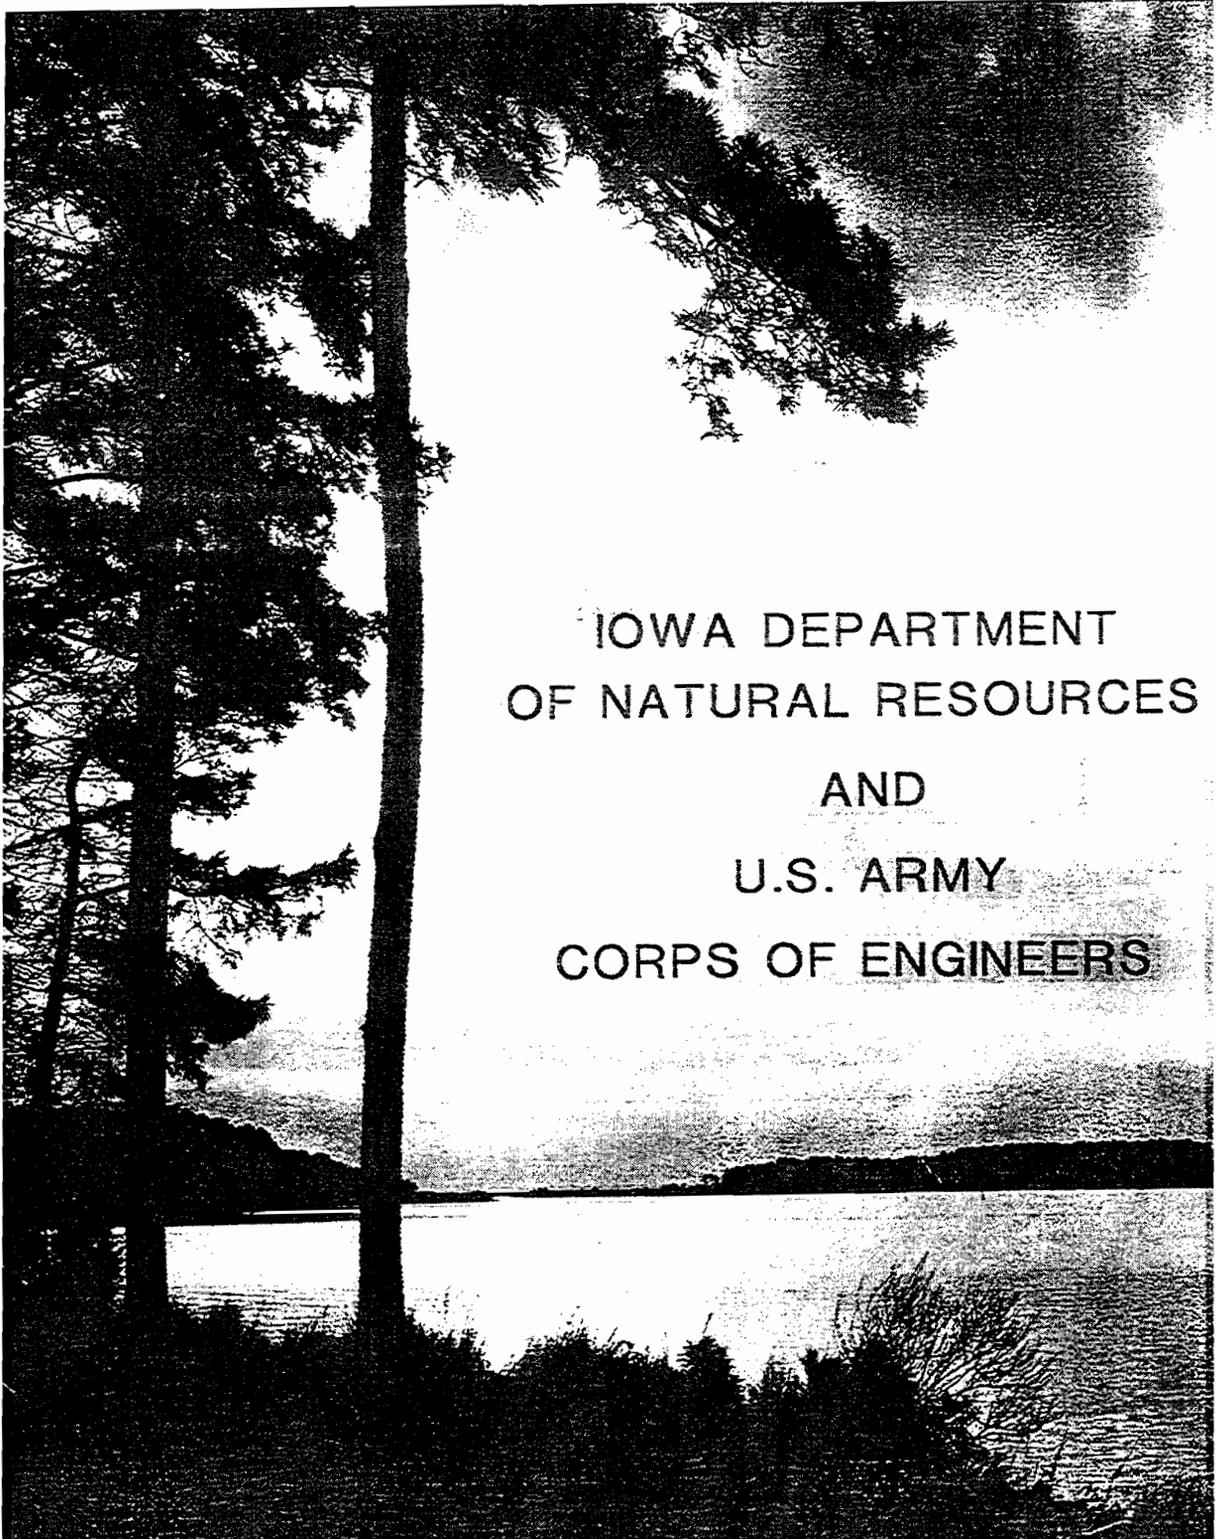

The copies of the completed application form and drawing sheets marked "Iowa Department of Natural Resources, Attention: Floodplain Permits Section, and Sovereign Lands" and any other pertinent information should be mailed to:

Iowa Department of Natural Resources
Wallace State Office Building
900 East Grand Avenue
Des Moines, Iowa 50319-0034

Please forward a copy of all approvals to this office when you receive them.

Should you have any questions, please contact our Regulatory Branch by letter, or telephone Ms. Sue Apple, 309/794-5376. **Please note that this phone number is the correct number to use when calling the Corps of Engineers. Older versions of the Iowa application packet have an incorrect number for the Corps.**

I. INTRODUCTION

Laws of the United States and the State of Iowa have assigned the US Army Corps of Engineers and the Iowa Department of Natural Resources with specific and different regulatory roles designed to protect the waters within and on the State's boundaries. Protecting Iowa's waters is a cooperative effort between the applicant and regulatory agencies. This application package has been designed to assist applicants in initiating the permit process with both agencies for construction, excavation or filling in a water of the state or on a floodplain. Instructions and application forms are contained within the package. This application package also contains a description of the activities that are regulated by these agencies, the applicant's role in protecting Iowa's waters, an explanation of the agencies roles, and a description of the application process.

2. REGULATED ACTIVITIES – WHO MUST APPLY

Construction, excavation or filling in streams, lakes, wetlands, or on floodplains may require permits from both agencies. The attached application form is to be used to begin the permit process for any of the following activities:

- a. cutting the bank of a river or stream;
- b. any excavation or dredging in a stream or river channel;
- c. channel changes or relocations (including stream straightening);
- d. construction of any permanent dock, pier, wharf, seawall, boat ramp, beach, intake or outfall structure on a stream, river, or lake;
- e. placement of any fill, riprap, or similar material in a stream, river channel, lake, or wetland;
- f. construction of a dam across any waterway;
- g. placement of fill, construction of levees, roadways and bridges; and similar activities on a floodplain; or
- h. construction of buildings on a floodplain.

The Iowa Department of Natural Resources also requires permits for the construction and operation of water and wastewater treatment facilities, water withdrawal, water storage, and solid waste disposal and should be contacted for information about these permits.

3. THE APPLICANT'S ROLE

Iowa's water resources were once seemingly abundant and limitless. As development intensified and technology advanced, it became apparent that individual and cumulative effects of man's actions did have an impact and there indeed was a limit to the state's water resources. State and Federal regulatory programs were established to protect the public's interest in these valuable water resources. The applicant's role is to obtain the necessary approvals and permits to conduct an activity so that the wise use and the protection and maintenance of the existing state's water resources can be ensured.

4. REGULATORY AGENCIES' ROLES

In Iowa, two agencies administer permit programs for protecting the state's water resources and ensuring their wise use. These agencies are:

- a. The US Army Corps of Engineers; and
- b. The Iowa Department of Natural Resources.

Their roles, when considered together, include the protection of navigable waters; protection against unwise floodplain development; ensuring the wise and beneficial use of water; maintenance and enhancement of water quality; protection of fish and wildlife habitat and protection of; the public interest.

The regulatory programs administered by each of these two agencies are described in more detail in Section 8, "Permit Programs." Each regulatory program listed under "Permit Programs" has distinctive review criteria and administrative and legal requirements.

5. THE PERMIT PROCESS

The application package is designed to assist the prospective applicant in meeting the various legal and administrative requirements of both agencies. By following the instructions for completing the application form and submitting a copy to each of the agencies listed in the instructions, the permit process is initiated. Each agency will review the application form to determine whether a permit (or permits) will be required. If a permit or permits are required you will be notified of that and whether any additional information will be needed before the permit can be processed. If a permit is not required from either agency receiving your application, you will be notified by that agency. Be sure to allow 60 to 90 days for application review and processing. Proceeding without the necessary permits is against state and Federal laws and may result in legal proceedings and fines.

6. PRELIMINARY COORDINATION

If you are unsure whether a particular action or project is regulated and requires a permit, or if you wish to discuss specific concerns with any agency, please call. The agencies and telephone numbers are listed in the instructions of the application form.

7. REPORTING UNAUTHORIZED CONSTRUCTION

Although the permit programs described in Section 8 on page 2 use the permit requirement mechanism to protect our waters, the programs also have specific powers to deal with unauthorized projects or activities. If you wish to request an investigation of a project which may be unauthorized, contact either of the agencies listed. Specific information describing the activity, dates and individuals involved, as well as photographs are extremely helpful and should be forwarded whenever possible. Remember, protecting Iowa's waters is a cooperative effort.

9. INSTRUCTIONS FOR COMPLETING THE JOINT APPLICATION FORM

Four copies of the application form and drawing sheets are provided. Submit one copy of the completed application form and drawings to the agency specified on the bottom of each form. The mailing address and telephone number of each agency is provided in Section 11. The copy labeled "Applicant's Copy" is for the applicant's records. This application form is printed on NCR (No Carbon Required) paper, therefore, use sufficient writing pressure to ensure that all copies are legible. The application form may be photocopied.

It is very important that the application is complete and accurate. If additional space is needed for any item on the application form, attach a separate sheet of paper to the application sent to each agency. A sample copy of a completed application is provided for reference.

IF YOU NEED ASSISTANCE IN FILLING OUT THE APPLICATION FORM, PLEASE CALL ANY AGENCY OFFICE LISTED.

Additional information may be required by any or all of the agencies before further processing of your application may proceed. The applicant will, however, be notified of such needs by the agencies.

General instructions for completing the application form are provided on the form itself. Specific instructions on completing items 3, 4, 5, and 12 of the form and the information to be provided on the drawings are provided in Section 10.

Information in the application is made a matter of public record through issuance of a public notice. Disclosure of the information requested is voluntary; however, the data requested is necessary in order to communicate with the applicant and to evaluate the permit application. If necessary information is not provided, the permit application cannot be processed nor can a permit be issued.

18 United States Code Section 1001 provides that: Whoever, in any manner within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device a material fact or makes any false, fictitious, or fraudulent statements or representations or makes or uses any false writing or document knowing same to contain any false, fictitious, or fraudulent statement or entry, shall be fined not more than \$10,000 or imprisoned not more than five years or both.

Applicant is informed that all approvals must be obtained before work can be started.

NOTE:

- a. If the applicant is a corporation, the president or other authorized officer shall sign the application form.
- b. If the applicant is a county, city or other political subdivision, the application form shall be signed by an appropriate authorized officer.
- c. If the applicant is a partnership, each partner shall sign the application form.
- d. If the applicant is a trust, the trust officer shall sign the name of the trustee by him (or her) as trust officer. A disclosure affidavit must be filed with the application, identifying each beneficiary of the trust by name and address and defining the respective interests therein.

DRAWING (forms provided)

Each sheet of drawing submitted should contain a title block in the lower right hand corner identifying the proposed activity, the name of the body of water, river mile (if applicable), number of the sheet and total number of sheets in set, and date the drawing was prepared. Certified engineering plans may be submitted in lieu of the drawing sheets if the magnitude of the project warrants. (Note: The Department of Natural Resources may require submission of certified engineering plans.)

(1) A vicinity map (in the upper right hand corner) which shows:

- a. project site;
- b. name of waterway;
- c. name of and distance to local town, community or other identifying location such as roads; and
- d. north arrow.

(2) A plan (overhead) view of the project showing:

- a. existing shoreline and the normal water surface elevation (if mean sea level datum is not used, adjustment should be indicated);
- b. adjacent property lines and ownership as listed in the application form;
- c. principal dimensions of the structure or work and extent of encroachment into the waterway (as measured from a fixed structure or object);
- d. floodway/floodplain lines if established and if known;
- e. north arrow; and
- f. graphic or numerical scale.

(3) A cross-sectional view of the project showing:

- a. shoreline, elevations, extent of encroachment, principal dimensions of the work as shown in plan view; and
- b. graphic or numerical scales (horizontal and vertical).

The Iowa Department of Natural Resources also requires permits for the construction and operation of water and wastewater treatment facilities, water withdrawal, water storage, and solid waste disposal and should be contacted for information about these permits.

3. THE APPLICANT'S ROLE

Iowa's water resources were once seemingly abundant and limitless. As development intensified and technology advanced, it became apparent that individual and cumulative effects of man's actions did have an impact and there indeed was a limit to the state's water resources. State and Federal regulatory programs were established to protect the public's interest in these valuable water resources. The applicant's role is to obtain the necessary approvals and permits to conduct an activity so that the wise use and the protection and maintenance of the existing state's water resources can be ensured.

4. REGULATORY AGENCIES' ROLES

In Iowa, two agencies administer permit programs for protecting the state's water resources and ensuring their wise use. These agencies are:

- a. The US Army Corps of Engineers; and
- b. The Iowa Department of Natural Resources.

Their roles, when considered together, include the protection of navigable waters; protection against unwise floodplain development; ensuring the wise and beneficial use of water; maintenance and enhancement of water quality; protection of fish and wildlife habitat and protection of; the public interest.

The regulatory programs administered by each of these two agencies are described in more detail in Section 8, "Permit Programs." Each regulatory program listed under "Permit Programs" has distinctive review criteria and administrative and legal requirements.

5. THE PERMIT PROCESS

The application package is designed to assist the prospective applicant in meeting the various legal and administrative requirements of both agencies. By following the instructions for completing the application form and submitting a copy to each of the agencies listed in the instructions, the permit process is initiated. Each agency will review the application form to determine whether a permit (or permits) will be required. If a permit or permits are required you will be notified of that and whether any additional information will be needed before the permit can be processed. If a permit is not required from either agency receiving your application, you will be notified by that agency. Be sure to allow 60 to 90 days for application review and processing. Proceeding without the necessary permits is against state and Federal laws and may result in legal proceedings and fines.

6. PRELIMINARY COORDINATION

If you are unsure whether a particular action or project is regulated and requires a permit, or if you wish to discuss specific concerns with any agency, please call. The agencies and telephone numbers are listed in the instructions of the application form.

7. REPORTING UNAUTHORIZED CONSTRUCTION

Although the permit programs described in Section 8 on page 2 use the permit requirement mechanism to protect our waters, the programs also have specific powers to deal with unauthorized projects or activities. If you wish to request an investigation of a project which may be unauthorized, contact either of the agencies listed. Specific information describing the activity, dates and individuals involved, as well as photographs are extremely helpful and should be forwarded whenever possible. Remember, protecting Iowa's waters is a cooperative effort.

JOINT APPLICATION FORM
ITEMS 1 AND 2 FOR AGENCY USE

1. Application Number	2. Date Received
-----------------------	------------------

3. AND 4. (SEE SPECIAL INSTRUCTIONS) NAME, MAILING ADDRESS AND TELEPHONE NUMBERS

3a. Applicant	3b. Applicant	3c. Applicant
Business () - Home () -	Business () - Home () -	Business () - Home () -
4a. Authorized Agent (if any)	4b. Authorized Agent (if any)	4c. Authorized Agent (if any)
Phone () -	Phone () -	Phone () -

5. PROJECT DESCRIPTION AND REMARKS:

6. IMMEDIATE AND ADJOINING PROPERTY OWNERS:

7. PROJECT LOCATION

STREET, ROAD OR OTHER DESCRIPTIVE LOCATION	Legal Descr.	Quarter	Section	Township	Range
IN OR NEAR CITY OR TOWN	UTM (Universal Transverse Mecator): If available		Zone	North	East
COUNTY	STATE	ZIP CODE	Waterway River Mile		

8. Date activity is proposed to commence _____ Date activity is expected to be completed _____

9. Is any portion of the activity for which authorization is sought now complete? YES NO If answer is "YES" give reasons in the Project Description and Remarks section. Month and Year the activity was completed _____ Indicate the existing work on drawings.

10. List all approvals or certification and denials received from other federal, interstate, state or local agencies for structures, construction, discharges or other activities described in this application.

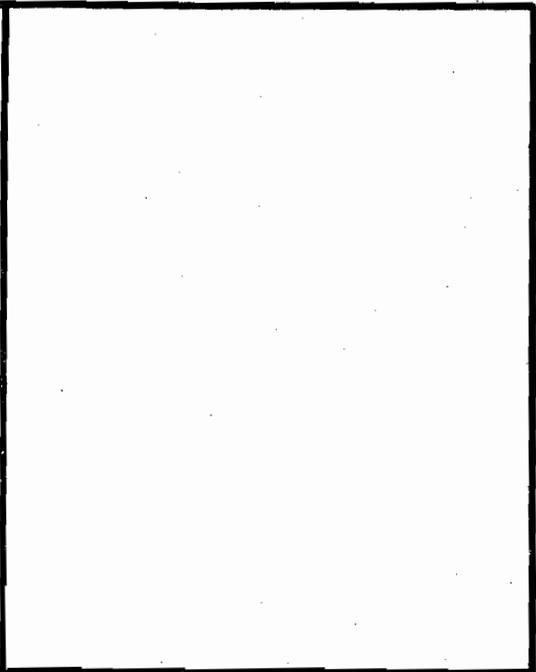

ISSUING AGENCY	TYPE APPROVAL	IDENTIFICATION NO.	DATE OF APPLICATION	DATE OF APPROVAL	DATE OF DENIAL

11. CONSENT TO ENTER PROPERTY LISTED IN PART 7 ABOVE IS HEREBY GRANTED. YES [] NO []

12. APPLICATION VERIFICATION (SEE SPECIAL INSTRUCTIONS)

Application is hereby made for the activities described herein. I certify that I am familiar with the information contained in the application, and that to the best of my knowledge and belief, such information is true, complete, and accurate. I further certify that I possess the authority to undertake the proposed activities.
