1. Which of the following applies to your situation?

- The proposed rail line is near my home.
- The proposed rail line is near my business.
- The proposed rail line crosses my property

Other, please specify Property owner, Primary Vulcan mining area's

2. What are your concerns regarding potential environmental impacts and do you have any mitigation suggestions?

The Wurzbach family does not have any mitigated suggestions. We are fully for the rail road and to put the Vulcan into operation. The rail road will be an improvement rather than to have a couple hundred trucks circling around in the area. They are big winners in Medina County. The quarry will produce a lot more revenue than cattle and ranching. We can verify that Vulcan material has many flags and certificates of awards for safety, environmental and community service.

3. Please use this space for additional comments or suggestions.

The president of Medina County Environmental Action Association and his protesters have been lying to some local people, according to DuBois. Vulcan material operation will create a celebration for the entire area. Not true. When he is stupid enough to build a \$200,000 dam in the middle of the flood plain of the Quaker Creek makes it questionable what qualifications he has for his flood protesting. In other opposition comments by DuBois and his protesters they will the dust from the material being hauled by the railroad, people will get sick and die. The blasting will damage and crumble the Medina Lake dam and many people will drown in eastwinds. The blasting will damage all the wells and put the people out of water and many other untruthful statements. The truth of the matter is Vulcan will not perform any actions that would be harmful to anyone.

Thank you for your comments.
